

Advanced Orchard Health for Sustainable Fruit Production

With Michael Phillips moderated by Harry Hoch

Thursday February 23rd Radisson Hotel, LaCrosse Wisconsin

Registration / check in will begin at 9:15. The workshop will be 9:45 - 4:30

Sponsored by the Organic Tree Fruit Association (OTFA) with support from MOSES.

Fruit tree culture has been stuck in allopathic mode for far too long, solely seeking out short-term fungicides and antibiotics to destroy disease-causing organisms *from without*. We never understood that the tree's own immune ability could be coupled with the stimulation of friendly microbes to defeat disease *from within*. Join orchard health expert Michael Phillips for a day of in-depth orchard care geared towards fruit producers looking for sustainable and nature-based production techniques.
